representation is being made that any account or individual trader will likely achieve profits or losses similar to those shown, described, posted, taught, or discussed in the chat rooms, training rooms, or over the telephone. There are frequently sharp differences between individual trading results between other traders exposed to the same information or posts and the actual trades taught or used as an example in the postings or teachings in the chat rooms, the training room, or over the telephone. In addition, hypothetical trading does not involve financial risk. No hypothetical trading can completely account for the impact of financial risk in actual trading. For example, the ability to withstand losses or adhere to a particular trading methodology, strategy, or program despite trading losses are material points that can also adversely affect actual trading results. There are numerous other factors related to the markets in general or the implementation of any specific trading method, strategy, or program that cannot be fully accounted for, all of which can adversely affect actual trading results. The methodologies, indicators, strategies, and all other features of the SKAITUBE LLC chat and training rooms (hereinafter collectively referred to as the "Information") are provided for informational, educational, and demonstrational purposes only. They should not be construed as investment or trading advice. The analysts, instructors, posters, and employees or affiliates of SKAITUBE LLC may or may not hold positions in the financial instruments discussed or demonstrated at any given time in the chat or training rooms. The trades taught or trading examples given or used in the chat or training rooms may or may not be traded by SKAITUBE LLC or its officers, directors, employees, or instructors; hence, they are considered hypothetical trades. You should not rely solely on the information taught, posted, or discussed in the chat or training rooms in making any trade or investment decisions. Rather, you should use the information only as an educational guide and as a starting point for your learning and understanding of the markets and conduct additional independent research to allow you to form your own opinion regarding your trading or investing.
